Rocket fire from Gaza into Israel following a pattern going back to 2007 based on Mars's position in relation to the lunar node Books self.astrology

submitted 5 years ago by thedowcast

There is a pattern in which the time frame of Mars's position within 30 degrees of the lunar node correlates with the highest concentration of rocket fire from Gaza into Israel in relation to the rest of the year. This pattern is outlined and explained in Chapter 24 of Ares Le Mandat(4th ed) and substantiated going all the way back to 2007. This Mars correlation is also demonstrated in real time in the Youtube video where I was able to predict back in November of 2019, this recent escalation of rocket fire from Gaza into Israel which started back on January 15th 2020. Of course, the accuracy for this year 2020 cannot be confirmed until the end of the year when it would show whether or not rocket fire during the aforementioned Mars/lunar node phase(Jan 15 - Apr 3) exceeded the rocket fire during the months of 2020 when Mars would be outside of that range
